

# Orientation to managing sports teams

## Do you need help managing a sports team?

Orientation to managing sports teams is ideal for people who are working with team sports or with individual athletes making up a team at the school, junior local club or at a regional level. The program can be used as the basis for learning to manage a sports team at the more elite levels.

The program covers:

- Roles and responsibilities of a sports team manager
- The junior sports environment, including building the history and culture of the sport
- Understanding child protection and anti-harassment policies
- Codes of behaviour in sport, including junior sport
- Understanding and working with athletes
- Being organised and the team managers toolkit
- Working with people and organisations
- Athlete nutrition
- Harassment free sport
- Sport rage prevention.

## Picton
